

# **PAPER-LESS ASSET TRACKING with QR Code**

**ENJOY PAPER-FREE, DIGITAL ASSET TRACKING WITH  
QR CODE AND SMARTPHONE APP**

# Simple, Hassle-free and most Cost-efficient way to track and manage your asset life cycle

**INDTRAC** invites you to experience the joy of digital asset tracking with QR-Code alone. INDTRAC App lets you explore / audit current location and other status of every asset in real time. No other devices are needed. No costly hardware installation is necessary.

## SIMPLE, FAST AND EASY PROVISIONING

Add your assets, Create the QR Code, Download them to your drive, Print and Fix on your assets.

Now track them simply by scanning the QR code, fixed on your Asset, using the App. Every time, the QR code is scanned, the App records current status and GPS location of the asset. See locations and other status of your assets from anywhere. You Can add custom fields and get rid of your spreadsheets. Also change asset ownership – all from inside the App.

With powerful auditing feature, you would not need any other software to manage your assets.

## INDTRAC FEATURES AT A GLANCE

- **In-App QR Code Generation** – Generate unique QR Code for every asset  
- download the QR Code and fix it to your Asset
- **Scan QR Code and Update** – Your staff scans the QR code and updates the status of the Asset with the App
- **Enhance Location update** by creating your unique location tags that your users can use to update current location. This is in addition to GPS coordinates captured during each update.
- **Define your own custom workflow states** – Expand Your Asset life-cycle by creating your unique workflow states and watch as assets process states get updated
- **Create Department** and group assets around departments
- **Add new user-defined attributes for Asset** – INDTRAC lets you define assets attributes unique to your site so that you do not need separate spreadsheet applications to maintain those details.
- **Assign Custody of Asset to Users** – Admins can assign custody of assets to users
- **Audit Assets** – Select an Asset, audit previous asset movements or past Custody changes
- **Role-based Information Access** – Separate access control for Admin and non-admin users

- **Simple in-app user management**– Users self-registers using secret passcode. Admin can remove a user or reset the passcode.
- **Monitor from anywhere, any time** – View last scanned status and location on Google Map
- **Custom Reminders** – Add custom reminder for AMC renewal or Service dates for each asset and get timely alert delivered to your Phone so that you are never hassled about missing Renewal date
- **Real time Alerts** - Real-time Alerts delivered in your App
- **App is the only software you need** – no complex software installation, no special hardware needed, no special network needs to be arranged
- **Powerful and User-friendly Reporting** - Generate reports for your assets from the App and get it emailed to you. Report customisation
- **Future-proof Tag technology** – INDTRAC already supports Indoor tracking using RFID/BLE Tags which means a smooth transition to Real-Time Indoor tracking for your users in future.
- **Custom domain support** – INDTRAC provides custom installation support for your own custom internet domain. Terms & Conditions Apply
